

Bioeconomy? Easy as can be with AllThings.Bio

Bioeconomy can transform our day-to-day lives in a multitude of aspects: from the way we pack our food, to the clothes we decide to buy and wear.

Knowing the ins and outs of the bio-based economy, though, can be tricky. That's where AllThings.Bio can come to your aid!

Funded by [H2020 project Allthings.bioPRO](#), a **collection of up-to-date, fresh and engaging media is being built** to help citizens navigate the bioeconomy world with confidence and competence. You can access them via the freshly renovated portal, www.allthings.bio, where articles and interactive media are available.

The project will focus on four main themes, namely **bio-based food packaging, sustainable fashion and textiles, bio-based products for kids and schools** and the **jobs and careers in the bioeconomy**.

You can learn more about the project through our [presentation video](#), but don't forget to follow us on social media to stay in touch with AllThings.Bio! You can find us on [Facebook](#), [Twitter](#) and [LinkedIn](#).

The project is now in the middle of the co-creation process **to build a serious game and mobile application** with the precious input of citizens: our regional partners are hard at work with the local communities to learn about the expectations of citizens and their most pressing concerns with regard to the bioeconomy.
