

EBiSC2 – A sustainable European Bank for induced Pluripotent Stem Cells

- ❁ **Goal:** EBiSC2 as **central iPSC hub** pooling EU resources to structure iPSC landscape in terms of quality, consistency, available data, standards and licensing agreements
- ❁ **What EBiSC2 offers iPSC-related projects:**
 - Support in legal and ethical aspects
 - Advice on iPSC generation and handling
 - **Make your iPSC lines and data sustainable and accessible via a deposit in EBiSC**
- ❁ **EBiSC2 services upon demand:**
 - **QC panel** testing according to established EBiSC guidelines
 - **Cell line commissioning** (iPSC generation, differentiation and gene-editing)
 - **Backup** your iPSC lines in the ISO-certified, monitored EBiSC bank
 - Pre-defined disease-specific **cell panels for screening** purposes
- ❁ ... while ensuring **clear IP rights** and **visibility** of your project
